Re: Redwood Chips

To whom it may concern:

Our 100% Redwood Chips are derived from raw Redwood logs and are ground to size. The point of origin for our chips is Willits, California. This is a very economical product and is excellent for large commercial applications. This is also an excellent product for hillsides or uneven surfaces. The bark complies with the Cal-Trans Standard Specification 20-2.08 Mulch.

- **Redwood Chips are light and medium brown**
- **The particle sizes range from 1" - 3"**
- **The average full load size is 100 cy**

Sincerely,

David Ray
