Re: **Medium Bark Nuggets (Fir Bark)**

To whom it may concern:

Medium Bark Nuggets are ground and screened to a 1" to 2" inch size. This premium product has a high concentration of fines to block weeds, yet leaves a layer of nuggets on the surface when you rake it out. Medium Fir bark is an excellent ground cover not only for its tailored appearance, but as the bark decomposes, it naturally amends the soil.

- **Medium Bark Nuggets are reddish brown in color**
- **The particle sizes range from 1 " - 2 "**
- **The average full load size is 100 cy**

Sincerely,

David Ray
